CASE STUDY: HUNTERS, POCKLINGTON

"Having a very small window space and not been able to display many of our properties for sale has always been a problem for me and has on occasions lost me instructions. One of my colleagues at another branch was having an interactive display installed and I thought this might be the answer to all my problems. I was not originally aware of intouch and was sold a much inferior product by another provider - thankfully though I was able to put a stop to this and the guys from intouch provided me with the correct solution for my needs. My window has now been installed and I am extremely happy with the response we have had from it and the increase in business it has already brought in - I wish I had known about it sooner!"

TESTIMONIALS

Just a quick note to advise that we have already had tremendous feedback on the touch screen. We went for the portrait screen and it looks fantastic. We are on a busy thoroughfare and we are getting lots of interaction from passers-by, and clients like it with the '24 hours a day marketing' It gives us a unique USP over competitors.

Churchills

Having taken the technology complexities away and provided a sensational interactive property platform experience, our clients enjoy using the screens within our three branch network. Any technical issues that we have had have been dealt with swiftly and efficiently plus improvements and enhancements have been delivered without fuss. We would strongly recommend this company and Steve in particular to any other business. (Just not in our area!)

Crofts Estate Agents

The interactive screens went in today and I just wanted to let you know how great the guys fitting them were. From the moment they arrived they just got on with the job and were extremely professional. The result is that the screens look fantastic and we're delighted with them.

Venture Properties

The screen has created a lot of local interest and we already have a valuation booked in from it, which we're very pleased about! The whole process was carried out very efficiently from start to finish by you and your team and everyone involved has been extremely helpful.
